REPLY TO: 2720 Special Use Permits

June 2, 1969

SUBJECT: Application to put up signs and petitions in Mineral King area.

TO: Mrs. Richard Koch
6334 W. 80th Street
Los Angeles, California 90045

I have disapproved your application for a permit to place signs and petitions along the road in Mineral King. Such signing cannot be construed as being needed for the convenience of the public, or directional in nature. Signing approved for installation on National Forest land must meet one of these criteria. I have carefully looked at all of our regulations and policy and this is the only conclusion I can reach.

It is obvious if the signing and activity you propose were permitted under the regulations for managing the National Forests that it would be difficult to see the woods for the signs.

At the Forest Service Station in Mineral King there is a bulletin board. I have asked Ranger Werner to make half of this board available for notices to be posted by the public. You are welcome to place your petition on this bulletin board. We must require the name and address of the person placing material on the board be included with the material.

We hope this will satisfy your needs.

M.R. JAMES
Forest Supervisor
